The June Hancock Mesothelioma Research Fund invites you to “Meet the Researchers”

The June Hancock Mesothelioma Research Fund (JHMRF) is an independent charity. Our primary objective is to fund research in mesothelioma. Since its inception in 1997, the JHMRF has raised £1.7m to build a comprehensive portfolio of research studies. Over the last 20 years we have funded projects that span the whole spectrum of research, from early experiments with newly discovered compounds to a clinical trial investigating the role of radiotherapy in symptom control in mesothelioma. We also fund research fellowships to support young scientists with an interest in mesothelioma research.

Every year we hold a free event that takes place on national Action Mesothelioma Day. “Meet the Researchers” is your opportunity to learn about the research the JHMRF is supporting and about other types of research too. The event has an informal style allowing attendees to meet research doctors and scientists in small groups to hear about research topics first hand, and to ask them questions.

We believe that research offers hope for the future. Join us on Friday 6 July 2018 to “Meet the Researchers” and hear about the exciting and interesting work that is being done, lunch and refreshments will be provided. Specialist nurses, legal experts who deal with mesothelioma cases, trustees of the JHMRF and local support groups will also be in attendance. They will be pleased to talk to you informally during the breaks, and provide information or advice.

We look forward to welcoming you in July!

The June Hancock Mesothelioma Research Fund
A UK registered charity number: 1121784
www.junehancockfund.org

A member of the Association of Medical Research Charities and a National Institute of Health Research partner organisation.
